

ABOUT

» According to WHO, obesity affects **1.9 billion adults** worldwide[1].
» To avoid unhealthy weight gain, total fat should not exceed 30% of total energy intake[1].

WHY

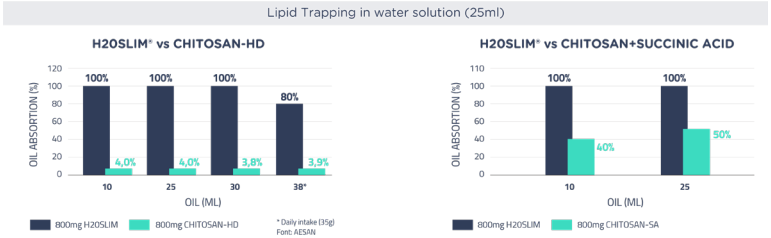

» **Best weight control ingredient:** H2OSLIM® reduces fat absorption and facilitate its elimination.
» **Natural product:** Non-animal polysaccharides 100% water soluble.
» **Electrostatic lipid trapping:** Once ingested, H2OSLIM® creates a cationic polymer, harmless to the body, capable of trapping up to 80% of daily fat intake ingested through physical and electrostatic forces.

POSOLOGY **400g** before meals.

WorldHealthOrganization2018 | Source: Global Health Observatory. **2.** Gemma Clemente-Ramos, H2Oslim®, the water-soluble polysaccharides from Agaricus bisporus, significantly reduces body weight and improves lipid parameters in overweight humans in a randomized double-blind vs placebo study. 2020 - 7(6). AJBSR. MS.ID.001205.

CLINICAL STUDIES

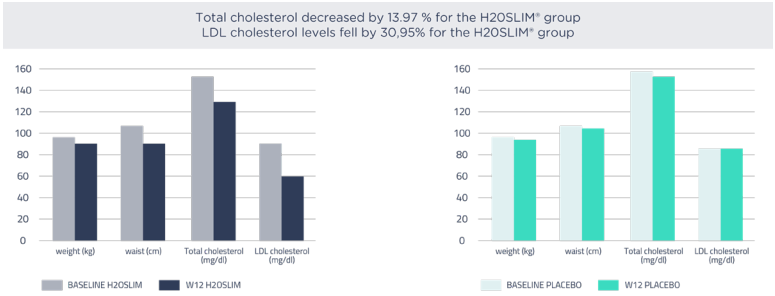

Chitosan Comparative Study.

H2OSLIM® could trap up to 80% of daily fat intake (38ml).

H2OSLIM® is 60% more effective than Chitosan + SA.

Randomized double-blind vs placebo-controlled design 12 weeks 100 healthy overweight volunteer[2].
