

ABOUT

» Migraine is an extraordinarily prevalent neurological disease, affecting **1 billion people worldwide**.

» Migraine is the **6th most disabling illness** in the world.

WHY

» **Anti-inflammatory and analgesic activity:** Neurasites® is a standardized extract of Tussilago hybrida* with the ability to reduce the frequency and severity of migraine attacks.

- 48% reduction of headache frequency in 4 month (n= 245)[1].
- 60% reduction of headache frequency in 2 month (n= 60)[2].
- 68% of the subjects had a greater than 50% reduction in frequency of attacks after 4 months[1].
- 50% reduction in the number of headache days per month[2].

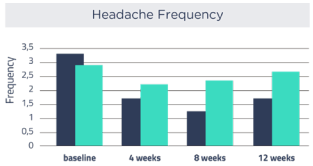

» **HPLC profile standardized in:** Sesquiterpenes as acetaminophen & Total Sesquiterpenes.

POSOLOGY **150mg** once daily.

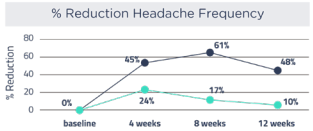

*Petasites hybridus syn Tussilago hybrida. **1.** Holland, S., et al. Academy of Neurology and the American Headache Society. Neurology, 2012, 78(17), 1346-1353. **2.** Martin, R. Life extension magazine.2006

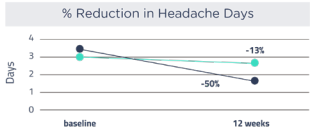

CLINICAL STUDIES

STUDY I

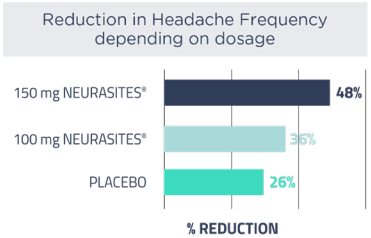

Neurasites® is effective for migraine prevention and should be offered to patients with migraine to reduce the frequency and severity of migraine attacks.

STUDY II

N: 245 patients (18 to 65 years old)
75 mg twice daily Petasites group: 68 subjects
50 mg twice daily Petasites group: 71 subjects
Placebo group: 63 subjects
T: 4 months

Only dietary supplement with level A “Established efficacy” evidence for the prophylaxis of migraine (American Academy of Neurology and the American Headache Society).
